EDUCATION

University of Illinois Urbana-Champaign

BS in Mechanical Engineering, Minor in Computer Science, Dean's List

Expected Graduation: May 2028

GPA: 3.92/4.0

SKILLS

- **Engineering Skills:** AutoDesk Fusion CAD, 3D Printing, Laser Cutting, GD&T, CompTIA A+, Whimsical
 - **Software Skills:** JavaScript, React.js, C++, Java, Python, SQL, Git, Claude Code
 - **Certifications:** Asana Ambassador, Asana Workflow Specialist, Asana Foundations Badge
-

EXPERIENCE

Simple Fractal

Remote

Product Automation Intern

June 2026 - August 2026

- Designed wireframes in Whimsical for 5 company automation bots, spanning both prototype and production stages
- Improved team wide reporting by creating an App Script automated Google Sheets system to track change history across 2 Asana portfolios with 10+ graphs, paired with a dynamic React dashboard
- Built and tested an automated task-creation pipeline connecting Gmail, Google Meet transcripts, and Asana with Claude, cutting down manual task capture for the team
- Performed QA for automation bots and shipped 10+ pull requests for UX improvements, new features, edge-case handling, and ETL script updates for existing customers

Teach For America

Remote

Ignite Fellow

February 2026 - Present

- Designed and delivered lesson plans 4 days/week for 4th-grade students, covering reading, spelling, and phonics
- Implemented active-learning strategies including read-alouds and guided questioning to boost engagement and comprehension in a virtual classroom setting

Hands-On Intelligence

Champaign, IL

Research Assistant; Professor Kyungwon Koh

January 2026 - Present

- Determined research methodology, questions, target subjects, and timelines to study human-AI interaction
- Collaborated with 7 other researchers organizing 10 person workshop to analyze AI integration in craftwork spaces

Handshake AI Fellowship

Remote

AI Trainer

October 2025 - March 2026

- Developed and evaluated 20+ domain-specific prompts to assess the performance of large language models (LLMs) in multimodal AI evaluation and content generation
- Analyzed 30+ LLM outputs for scientific accuracy, clarity, and depth in specialized subfields

Jackson Innovation Studio

Champaign, IL

Maker Lab Assistant

November 2024 - May 2025

- Managed inventory and checkout with Notion software for 50+ precision tools in university engineering lab
 - Worked with 75+ students to optimize 3D print designs resulting in an average of 20% improvement in print time
 - Tracked 10 design course budget sheets to accurately record teams' material purchases and prevent overspending
-

LEADERSHIP

Sunday Coding Studio

Champaign, IL

Tech Lead

January 2025 - May 2026

- Led year long workshop for 15 middle school students focused on Python programming and Arduino projects
 - Used personal journals to track project milestones for 5 teams to ensure completion of capstone full stack projects
-

PROJECTS

Arduino Robot Arm

July 2026

- Built a 5 degree of freedom robotic arm from 3D-printed components, driven by 6 servo motors (3× MG996R for waist/shoulder/elbow, 3× SG90 micro servos for wrist roll/pitch/gripper)
- Isolated a 5V/2A+ external supply for servos from Arduino's logic circuit to handle high current draw under load
- Programmed motors using PlatformIO, controlling all six servos via the Arduino Servo library with speed controlled interpolation for smooth, non-jerky motion
